(DBMS) |
Git

SOFT SKILLS

Problem Solving |
Time Management | Teamwork

Aman Yadav

Frontend Developer

PROFESSIONAL SUMMARY

Eager and adaptive Front-End Developer Intern with a penchant for rapid skill acquisition. Proficient in HTML, CSS, and JavaScript, complemented by a foundation in Python and Basic DSA. Adept at leveraging version control with Git. Seeking to contribute technical prowess and enthusiasm to dynamic project environments.

PROJECTS

1. orbitz | 🌐 | 📱

HTML5 | CSS3 | JavaScript | Git and Github

- Developed a dynamic travel booking platform, enabling users to book flights and cars seamlessly.
- Implemented user authentication for secure login and account creation.
- Designed and implemented an interactive slider for an enhanced user experience.
- Ensured responsive design with simple animations and images for a seamless user interface.
- Utilized HTML5, CSS3, JavaScript, Git, and GitHub for efficient development and version control.

2. Temperature Measurement | 📱

Python | Git and Github

- Implemented a weather information system allowing users to check the current temperature using an API key.
- Utilized RESTful APIs and asynchronous request handling for retrieving temperature data.
- Troubleshoot and debugged issues to improve overall application performance.
- Using Python programming language
- Ensured cross-browser compatibility and responsive design principles.
